

Mailroom Instructions (CMS)

Overview

CMS will receive a daily email (M-F) with a .CSV file to use with Stamps.com. The .CSV spreadsheet contains information for two address labels (first class package for the outside envelope, and a first class letter for the inside envelope). The PDF portfolio contains the documents for each mailing, usually 2-4 PDF pages for each package. **Each first class package will be mailed containing 2-4 PDF pages and a return envelope.**

97tax will provide:

- 6x9 poly envelopes upon request
- postage through Stamps.com account automatically.

Steps

1. Download the attached .CSV spreadsheet and PDF portfolio daily at 97tax.com/mailroom. You will receive a system email notifying you that a new spreadsheet is available. Put the .CSV document in a set folder location on the PC that stays the same. This folder location must have only the most recent .CSV file contained within (delete the previous days .CSV file).
2. Login to the 97tax Stamps.com account. Select the "Order Label" profile and click "Import Orders".

Note: You may need to open this spreadsheet and click "save" to avoid an error. Do not edit the spreadsheet.

Note: If the "Ambiguous Address" window pops up, always select "Accept All". If "Accept All" is not an option, select "Accept" until "Accept All" becomes available. If neither "Accept All" or "Accept" are available, you must select an address from the list. Never select "Skip" or "Skip All" unless it is truly unfulfillable, it will create errors. Select the address from the list that most closely resembles the original address- it is nearly always the last or the first address in the list. If an order is truly unfulfillable and , email joe@97tax.com with the order number and do not mail the order. Truly unfulfillable order include, but are not limited to the following:

- A missing street address number, i.e "Pine Street, tampa, FL 33511".
- USPS requires the selection of an address with an APT number when no APT number is present on the spreadsheet.
- USPS requires selecting a different street number, i.e "246 town drive" vs the original "146 town drive".
- USPS requires selecting an address with a different zip code.

Note: Names or addresses with accented characters (é) will match USPS standards and will create an error. Change the character to the English character. Example: "Miguel Pérez de Jesús" should instead be "Miguel Perez de Jesus".

3. In the "Order Label" profile, click the "Select" menu from the toolbar and click "select all" from the dropdown menu. Then, click the "Preset" menu and click "Order Label". All postage should be calculated with green check marks visible. Print. Add postage if necessary.
4. Select the "Labels to the IRS" profile and click "Import Orders".
5. In the "Labels to the IRS" profile, click the "Select" menu from the toolbar and click "select all" from the dropdown menu. Then, click the "Preset" menu and click "Labels to the IRS". All postage should be calculated with green check marks visible. Print. Add postage if necessary.

Note: The "Order Label" and "Labels to the IRS" profiles cannot be printed at the same time. Select "print" separately for each profile.

6. Select the "History" tab. Select "Today". Download the history as an Excel spreadsheet, and upload to 97tax.com/mailroom.

Note: You may need to open the spreadsheet once and save it for the system to accept it. Do not open it again after saving.

Note: As a backup to the desktop application, you can login to stamps.com to download the spreadsheet. Use the same Stamps.com login info as the desktop app.

7. Print the PDF portfolio pages.
8. Assemble the mail pieces using provided 6x9 poly envelopes.
Note: Each mail piece contains unique labels and documents that must be matched. Ex: the outside label, inside return label, and PDF document will all have the same customer name listed.

PROBLEM!? Email Joe at joe@97tax.com with an email describing the **specific** issue. Be sure to put "mailroom" in the subject. If you solve the issue yourself before receiving a response, send another email to update this.

Envelope Request

Email Joe at joe@97tax.com with an email when low on envelopes. Be sure to put "mailroom" in the subject.
